# **Course Outline: Mathematics 9**

## **Course Description**

The curriculum for this course is organized around these Big Ideas:					
The principles and processes underlying operations with numbers apply equally to algebraic situations and can be described and analyzed.	Computational fluency and flexibility with numbers extend to operations with rational numbers.	Continuous linear relationships can be identified and represented in many connected ways to identify regularities and make generalizations.	Similar shapes have proportional relationships that can be described, measured, and compared.	Analyzing the validity, reliability, and representation of data enables us to compare and interpret.	
Students are expect	ted to know the foll	owing:			
<ul> <li>operations with rational numbers (addition, subtraction, multiplication, division, and order of operations)</li> <li>exponents and exponent laws with whole-number exponents</li> <li>operations with polynomials, of degree less than or equal to 2</li> <li>two-variable linear relations, using graphing, interpolation, and extrapolation</li> <li>multi-step one-variable linear equations</li> <li>spatial proportional reasoning</li> <li>statistics in society</li> <li>financial literacy — simple budgets and transactions</li> </ul>					

#### **Course Layout**

Each unit features two quizzes, a Learning Guide, an Inquiry Project, and a Unit Test. Unit 7 only has one quiz. This course is broken down as follows:

Unit	Торіс
Preliminary Assignments	About Me
	Course Outline
1	Numeracy
2	Exponents
3	Equations
4	Polynomials
5	Graphing & Tables
6	Geometry
7	Data Analysis
8	Finances
Course Completion	Core Competency Reflection

#### Activation

To finalize registration in the course, students need to complete the Learning Guide and Inquiry Project for Unit 1 within 30 days of registration. Students may be removed from the course if this has not been completed in time.

#### Assessment

Each assignment, including the Learning Guide and the Inquiry Projects, will be marked on the proficiency scale. There is a rubric attached to each assignment.

Quizzes and Tests will be marked using a percentage.

Percentage	Proficiency Scale
86%+	Extending
73% - 85%	Proficient
60% - 72%	Developing
50% - 59%	Emerging
<50%	Additional Support Required and Retest

At the end of the year, students will receive a Proficiency Assessment for the course. There are no percentages or grade letters given in this course.

Proficiency	Explanation
Extending	Student has demonstrated a sophisticated understanding of the concept and competency and/or broadened learning beyond the expectations of this outcome. The work is detailed and tidy and demonstrates an exceptional understanding of the learning outcomes.
Proficient	Student has a complete understanding of the concept and competency. The work is tidy and demonstrates the strategies used to solve the problems.
Developing	Student has demonstrated a partial understanding of the concept and competencies.
Emerging	Student has demonstrated an initial understanding of the concept and competency and require additional support to demonstrate understanding.

#### **Learning Guides and Inquiry Projects**

These are the primary assignment for each unit. Students will download the Learning Guide at the start of each unit and complete it as they go through the unit. Students are expected to keep their work neat and organized, communicate their ideas as well as they can, and not skip any questions.

Before writing a unit exam, students must submit all assignments leading up to the exam. Students should be reviewing feedback from the teacher for the Learning Guide before taking the unit test.

#### **Exam Supervision**

Students may complete quizzes independently.

All exams are "closed book" and require supervision from a parent, guardian, or teacher. No additional notes or resources are to be used while taking the test.

### **Course Activity**

Students must be working to complete learning engagements on a regular basis. Students who are inactive after two weeks will receive an email to their Brightspace email program providing a warning of inactivity. Students who are inactive after 1 month may be withdrawn from the course. If a student is planning to be inactive due to personal reasons, they need to contact their teacher to inform them of the period of inactivity.

Students should aim to complete a minimum of one unit per month to finish the course within a 10-month period.

#### **Contacting the Teacher**

Students are expected to contact the teacher when help is needed or questions arise. The best way to communicate with the teacher is through the Brightspace Email program. Students should be checking their Brightspace email program at least once a week.

Parents and Guardians can email the teacher at <u>Elixa.Neumann@burnabyschools.ca</u>

#### Resources

There are NO textbooks required for this course. Students need a basic scientific calculator.

#### Plagiarism

Plagiarism is unacceptable under any circumstance. Students are expected to create authentic work which demonstrates their own understanding. If students are caught cheating, plagiarizing, or submitting AI-generated responses within this course, they may be removed from the course. All sources must be cited.
